Project Management Business Analyst | Ecommerce, Banking
Boston, Massachusetts, United States

Summary

I turn financial and customer data into strategy that ships, and moves the numbers. Across 10+ years at Alibaba (AliExpress), SberBank, Global Fashion Group (Lamoda), and Big 4 audit/consulting, I've owned strategy for a \$7B+ GMV portfolio that grew 5x YoY, generated 5x ROI on a pre-seed investment, driven 2–5x GMV growth for e-commerce sellers, and led U.S. market entry for a retail brand from the ground up. The focus: bridging finance, product, and operations to solve real customer pain points, then proving it in the numbers, like a loyalty program that lifted repeat purchases 20%+. I'm now building on that with an MS in Applied Business Analytics at Boston University, adding R, Python, and AI-driven workflows to a finance-first toolkit. Always drawn to how digital platforms and AI are reshaping commerce, and to the strategy and numbers behind that shift.

Experience
